

# Python for Beginners

These are the files for a course in Python for beginners. To open the handout, `00-handout.ipynb`, you can either:

## 1. With Google Colab

Go to [colab.research.google.com](https://colab.research.google.com) and upload the file under the "Upload" tab.

## 2. With Python installed on your computer

### Install Python:

If your institution/workplace does not have an official guide for installing Python (see e.g. [DTUs guide](#)), the easiest way is to install the Anaconda distribution:

1. Go to [anaconda.com](https://anaconda.com) and click Download.
2. Follow the installation guide.
3. Check that you have installed it correctly by opening the Anaconda Navigator program
4. If you encounter any problems, you can get more help here: <https://docs.anaconda.com/free/troubleshooting/>

### Open the file:

1. Open Anaconda Navigator from your programs/apps on your computer.
2. Open **Jupyter Notebook** (with the "Launch" button).
3. You will now see an overview of your file system. Navigate to the folder where the file is located and double-click on it to open it.
